

DUSTITE

DESCRIPTION

DUSTITE is a waterbased blend of specialized polymers and penetration additives designed to bind and suppress dirt and dust.

FEATURES

- DUSTITE will tolerate excessive cutting with water.
- High temperature stability.
- Excellent erosion resistance in both dry and wet conditions.
- On drying the sandy soil takes on a plasticised nature, giving support but not a hard, crusty surface liable to break up.
- Better for the environment: No salt type compounds involved such as sodium lignosulphonate.
- Can be used in various dilutions depending on the use required.
- No drop out or sediment leading to no blockages or wearing of taps or watering lines.
- Non Hazardous and having no exposure or biological limit values assigned
- Unique surfactant package allows DUSTITE to penetrate.

APPLICATIONS

Stockpiles
Roads
Driveways
Land development
Surfaces prior to bitumenisation

DILUTION

Dilutions of DUSTITE can be as high as 10% down to as little as 1.5%.

Trials are recommended to determine the best dilution rate.

CLEAN UP

Clean up wet DUSTITE deposits with water.

STORAGE

Store DUSTITE in sealed containers under cover in a cool area away from foodstuffs.

PACK SIZES

DUSTITE is sold in packs of 200 and 1000 litres.

TRANSPORT

DUSTITE is a waterborne product and not in the hazardous goods category. It should not be transported next to food items.
